CONTENTS

Volume 15, Number 3, 2026

Cell-free Supernatant of Pseudomonas aeruginosa SWUC02 Suppresses Pythium deliense Infection in Durian via ROS and Defense Gene Modulation 38
*T. Chan-In, N. Jaroenkit, N. Sudyoung, O. Pringsulaka, and S. Sarawaneeyaruk **

Review on the Development History and Research Progress of Cancer Immunotherapy: From Immune Checkpoint Inhibition to CAR-T Cell Therapy 43
Tian Yuan

Development of 24-hours Long Lasting Sustained-release Bilayered Matrix Tablets of Ondansetron Hydrochloride with the Synergistic Application of ANN and QbD 48
*Pavel Rahman Tonmoy * and Nahid Sharmin*

Advances in Immune Engineering Biomaterials for Precision Immunotherapy 55
Zhengrui Huang

Aspirin's Centenary Journey: From a Historic Discovery to a Cornerstone of Modern Medicine 60
Xinyue Zhang

Correlation Study and Treatment of Malignant Tumors with Differentiation Induction in Traditional Chinese Medicine 66
Xiangyi Lin

Multidimensional Engineering of CAR-based Cellular Immunotherapies for Ovarian Cancer 70
Yeyao Guo

Macrophage-mediated Immune Cell Interaction Network and its Synergistic Immune Escape Mechanism in Leishmania Protozoa Infection 75
Iris Tsoi

Research on the Epidemiology of Zoonotic Diseases Due to Overgrazing—Take Echinococcosis as an Example 78
Jingyaoshu Xu

Advances in Stem Cell-based Therapy for Alzheimer's Disease: Monotherapy, Combination Strategies and Stem Cell-derived Extracellular Vesicles (Exosomes) 81
Peixuan Zhang

Cardiovascular and Renal Outcomes of GLP-1 Receptor Agonist and SGLT2 Inhibitor Combination Therapy in Type 2 Diabetes: From Mechanistic Synergy to Clinical Evidence 85
Xiaofan Weng

Application and Prospect of Stem Cells and Biomaterials in Oral and Maxillofacial Tissue Regeneration 90
Yiyang Zhao

Current Status, Efficacy Evaluation and Development Prospects of Pharmacological Treatments for Alzheimer's Disease.....94
Xinran Wang

Advances in Targeted Therapy for EGFR-mutated NSCLC Brain Metastasis.....97
*Jingxuan Pang * and Lewei Li*
